

How to use CeresGate Downlink API

Created at:2025-12-10

Author : CREATIVE5INC.

Step 1 –Get Your Access Token

- API URL

- <https://tukggshh8k.execute-api.us-east-1.amazonaws.com/Prod/apicall>

- API Raw Data Payload

```
{  
  "apiname": "get_access_token",  
  "username": "Your account on CeresGate",  
  "password": "Your account password on CeresGate"  
}
```

- Returned Result Sample

```
{  
  "statusCode": 200,  
  "access_token": "Access Token String from CeresGate"  
}
```

Sample Command for cURL to get “Access Token”

- This cURL was sent from Linux command line

```
curl--location 'https://tukggshh8k.execute-api.us-east-1.amazonaws.com/Prod/apicall' \
--header 'Content-Type: application/json' \
--data-raw '{
  "apiname": "get_access_token",
  "username": " input your account information",
  "password": " input your password"
}'
```

Step 2 –Execute Downlink API

- API URL
 - <https://tukggshh8k.execute-api.us-east-1.amazonaws.com/Prod/downlink>

- Raw Data Payload

```
{
  "apiname": "downlink_to_ue",
  "username": "Your account on CeresGate",
  "data": {
    "IMSI": "IMSI Number for Your Hestia Dongle",
    "Payload": "48656c6c6f20576f726c64"
  }
}
```

YourPayloadString : HexString , example : “48656c6c6f20576f726c64” = “Hello World”

- Returned Result Sample :

```
{
  "statusCode": 200,
  "body": "{\"message\": \"Success!\", \"ts\": 1765413757.114365}\",
  "headers": {
    "Content-Type": "application/json",
    "Cache-Control": "no-store, no-cache, must-revalidate, max-age=0",
    "Pragma": "no-cache"
  }
}
```

Sample Command for cURLto use “Access Token”

- This cURLwas sent from Linux command Line

```
curl --location 'https://tukggshh8k.execute-api.us-east-1.amazonaws.com/Prod/downlink' \
